Profile

Innovative Computer Science Engineer with expertise in **frontend development, AI-driven solutions, and cloud architectures**. Proficient in **React, JavaScript, and automation**, specializing in **building scalable, high-performance applications**. Experienced in **R&D and software engineering**, optimizing processes, enhancing user experiences, and integrating AI for intelligent automation.

Education

Sahrdaya College of Engineering and Technology , Kodakara, Computer Science Engineering CGPA: 7.56	2021 – 2025
Don Bosco Higher Secondary School, Higher Secondary Education RESULT :100%	2020 – 2021

Skills

Frontend Development: React.js, JavaScript (ES6+), HTML, CSS, Vite ,Tailwind CSS	Backend & Cloud Node.js, Express.js, SQL, REST APIs
Tools & Platforms NPM, Git, Docker, AWS	AI & Automation Generative AI, NLP, AI-based Process Automation

Professional Experience

Tata Consultancy Services (TCS), BFSI Strategic Advisory & Research Intern ⓘ • Developed AI-driven loan eligibility automation using Gen AI, reducing approval time by 40% and increasing loan approvals by 25% for a US bank. • Created an interactive financial learning game adopted by children , improving financial literacy engagement by 60% . • Engineered Tale App , an AI-powered storytelling platform with 95% accuracy in voice synthesis , increasing accessibility for the visually impaired by 90% . • Integrated an automation tool for prototype uploads, providing real-time insights on trending designs, reducing admin workload by 35% . Deployed an NLP chatbot , boosting customer engagement by 15% per quarter.	2024 – 2025 Trivandrum, India
Atos Syntel (Eviden), Research Intern (IoT & Cloud) ⓘ Optimized Apache NiFi data pipelines in Cloud IaaS, improving real-time freight visibility and predictive maintenance for 5,000+ trucks , reducing downtime by 15% and boosting efficiency by 20% .	08/2024 – 11/2024 Banglore, India
INCLUSYS ORG, AI for Neurodivergent & Alzheimer's Support ⓘ Developed an AI-powered memory assistance system with Alexa, enhancing recall efficiency for neurodivergent and Alzheimer's users by 80% , improving user engagement by 50% .	04/2023 – 06/2023 Kochi, India

Projects

ST Verse, Augmented Reality/Virtual Reality campus simulation ⓘ	07/2024 – 11/2024
Designed ST Verse , an AR/VR simulation of Sahrdaya College, offering a 360° immersive experience . Used by students and faculty , improving campus familiarity by 70% before arrival.	

Certificates

Gen AI ⓘ Level 3	Foundations of User Experience (UX) Design ⓘ Level 1
